

# LOWER SCHOOL - Extended Learning - Autumn 1

Please choose **two** pieces of home learning to complete. You can choose how to present your home learning but it must reflect the time you have been given. Although we cannot have home learning brought into school currently, we will celebrate your efforts in school and on the school website, so if you have made a model or picture, email a picture of it into us. Please ask your teacher if you have any questions.

## STONE AGE COUNTING

Use natural objects to show your number bonds to 10, 20 or 100. Take a photo to show what you have done.

## COLLAGE

Using your collage skills, create a typical Stone Age or Iron Age village scene. Try to use different types of material to make your collage more interesting and effective.

## FACT FINDING

Research the Iron Age/Stone Age and present your findings in any way you like. This could be an information booklet, a fact file, a power point presentation. The choice is yours.

## SCIENCE

In science we have been learning about materials. Choose some materials you have around the house or outside and make a stone age tool using the most appropriate materials you can find. Take a picture to share with us.

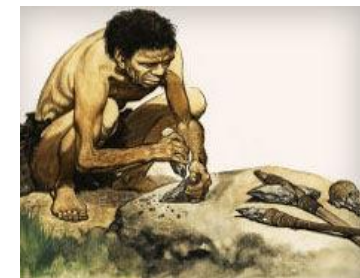

## MUSIC

Compose and perform your own Stone Age song or rap. This can be recorded and sent in via an attachment on email.

## HOW TO...

Find out about the different tools they made and used in the Stone Age/Iron Age. Then produce an Instruction Manual clearly explaining how to make some Stone Age/Iron Age tools.

**Due dates:** The first needs to be handed in on **Monday 2<sup>nd</sup> November 2020** (after half term) and the second on **Monday 7<sup>th</sup> December 2020**.
