

Computing Knowledge Organiser		
Year group: 5	Topic link:	Element of Computing: coding
Key Question: What are procedures and conditions in coding?		

Key Vocabulary	
Conditions	Conditions are basic “if, then” logic statements that modify how code is executed. Conditions are a key part of the decision-making process for computers.
Procedures	In programming a procedure or function is a defined piece of code that can be run multiple times. Similar to functions in mathematics, in programming functions have to have an input and an output, whilst a procedure can just run code without having any input or output.

Mediums and Resources
scratch – either on IPads or Laptops

My outcome will be
To code an app for drawing shapes using loops and repeating sequences

What key knowledge will I have by the end of this journey?
Confident understanding of the function of coding blocks for control, movement, pen, procedures and conditions
Understanding of the function of a procedure and how it can be applied to a drawing app.
Burgeoning knowledge of conditionals and conditional starts in coding.

What key skills will I have by the end of this journey?
Ability to create a procedure using coding blocks
Ability to use conditionals to determine when an app starts and stops.
Ability to draw a range of shapes using an app

Links to previous and future learning			
In Year 3 Apply knowledge of inputs and outputs to a Spike project	In year 4 Use loops and sequences with repetition	In Year 5 Use procedures with conditions and conditional starts	In year 6 Develop an app/ game/ device using knowledge of coding
