

# 'OUR WORLD' - KEEPING KEY SKILLS GOING IN ART!

## PAINTING

What materials could you find that could be used to make paint? Would tomato ketchup make red paint? Could salad cream make a yellow? Using materials found around the house, make different colours. Could you then find mark making tools such as a fork or spoon to create different effects? Explore different ideas and consider pattern, texture and shape.

## DRAWING

Collect any natural material from outside such as a flower, pinecone or leaf. Observe the detail closely. Now carefully re-create it using your sketching skills. Could you match the colours and pigments? Using your imagination, what else could this item be. Could a pinecone turn into a snail? Could a leaf be part of a butterfly? Now recreate a new drawing using the observational details.

## COLLAGE

Imagine life after 'Coronavirus'. Using magazines, papers, leaflets and glue create a collage with images of 'Positivity and Hope'.

## PRINTING

One for the whole family! Using your hands and feet to print with, make a colourful poster to show how you are all together in isolation. Label each hand and foot with the name and add a special message about being together.

## SCULPTURE

Make Salt Dough!

Using 250g flour, 125g salt and 125g water, create a material that can be shaped to create models that represent Positivity, Peace and Hope such as a rainbow, our planet or a heart. This can be air dried or baked in the oven for 30 minutes. Decorate with exciting colours and patterns.

## ICT

Look around at our environment. What has improved because we are all in 'lock down'? Does the sea look a turquoise colour? Are there more birds singing in the trees? Take photos of the benefits to nature and present in a collection. You could use software to manipulate the images and add labels to show positive messages about our cleaner planet.
