

## **Geography Home Learning Tasks**

The theme of our home learning is 'Our World' which fits fantastically with Geography! Below are some tasks that you can carry out either at home or out during your daily exercise. Some activities require more resources than others, but please don't feel like you have to do them all! They are ideas to keep you busy and have a bit of fun whilst we cope with our current situation. Don't forget to share with your teachers via the Seesaw app!

1. Find the national dish of the school classes and decide which ones you might like to try. You could cook for/with the family and create a table ranking them in order of preference. After, you could write a brief description of why you liked some more than others. Some ingredients are more exotic than others so be creative with what you have in the cupboards to create your own version of the dishes.
2. As part of your daily exercise, take photos of (or draw) your surroundings. Once you have decided on your favourite picture(s), collect fallen leaves, sticks, rocks, soil and other items that nature has to offer, bring them home, and create a collage of your picture. You could do this a couple of times in different areas to show how diverse Denmead is!
3. Create a passport of your previous travels or places you would like to go. Include information such as what you did/saw, or what you would like to do/see. Have a look at your own passport or one of family members to inspire your creation.
4. Make a geography fortune teller. Think of some places and landmarks you would like to visit and place them on a fortune teller. Could this be your next holiday destination?
5. Create a treasure hunt for your family using clues that you have made up. You could do it in the garden, in your house, or on a walk as part of your daily exercise.
6. Create a map of an imaginary island. Where is it located? How can you get there? What would you take? What does it have? What symbols would you use to show different things on your island?
