

Using the example above, use partitioning to calculate the

$$\begin{array}{r} \textit{Partitioning} \quad 47 = 40 + 7 \\ + 76 \quad \quad \quad 70 + 6 \\ \hline \quad \quad \quad 110 + 13 = 123 \end{array}$$

answers to the calculation below

$35 + 42 =$

$262 + 413 =$

$642 + 15 =$

$35 + 44 =$

$262 + 417 =$

$642 + 35 =$

$35 + 64 =$

$262 + 427 =$

$652 + 35 =$

$31 + 64 =$

$362 + 527 =$

$654 + 35 =$

$41 + 44 =$

$372 + 527 =$

$854 + 35 =$

$41 + 49 =$

$824 + 34 =$
